

Fujita Corporation's response to the disaster

Out of a collective sense of responsibility felt by the Construction Industry, we began reconstructing public infrastructures and private buildings immediately after the quake.

11 March 2011 : Creation of task forces to take immediate disaster countermeasures
(Headquarter and Tohoku-Branch)

13 March 2011 : Transport of the first emergency supplies for the Tohoku-District

14 March 2011 : 14 corporate members dispatched as support staff for Tohoku-District

By 21 March 2011 : 14 deliveries of supplies, total of 30 corporate members dispatched

Now, we are conducting many projects, for example the disposal of disaster-related waste, the decontamination of radioactive substances, and salt removal from agricultural land.

Support activity in the area around Ishinomaki

Removal of disaster-related waste on the main and branch road

Removal of disaster-related waste in the pier

Emergency restoration of coastal levee

Countermeasures for a submerged area
